

# JD Secure

**A Must for Successful  
Security Requirement**

**It is suitable for Close User Group Mobile Hand Phone that only allows Authorized Voice & SMS conversation within a limited "trusted" Close User Group or for those who wish to screen all SMS spamming and irritating calls from telemarketers or unauthorized persons.**

This mobile phone is incorporated with a specially designed security application to allow only trusted **close user group** to either communicate via voice or SMS within their own taskforce team members.

It is designed to minimize leakage of critical information from within the taskforce for security reasons. **It also prevents unauthorized voice or SMS tapping.**

This phone is very useful for applications: limitation of external communication for security guards, investigators, police during "special operations"; provide limited access to bodyguards or even children; and for cost control management on phone usage to certain group of employees.

**Close User Group Mobile Hand Phone** comes with a clear acrylic casing and a leather pouch. All Security agency and firms will find this a necessary addition to their arsenal.
